Missouri Assistive Technology Funds Available

The Department of Elementary and Secondary Education, Office of Special Education has announced: [Missouri Assistive Technology](#) has funds available to reimburse school districts for up to \$5,000 per student for technology identified in their IEP. The process includes districts submitting a one-page application, one-page price sheet, and one page from the IEP.

Common items which can be reimbursed include: FM systems, classroom sound field systems, iPad with apps, low vision equipment, tablets and computers for students needing an alternative to using a pencil, text readers for students not at grade level for reading, communication devices (that includes iPads) as well as other technology items.

If you have questions about what can be reimbursed and/or submitting an application, contact John Effinger at jeffinger@mo-at.org or 816-655-6709.
